

We look forward to servicing your business!

Product Spotlight

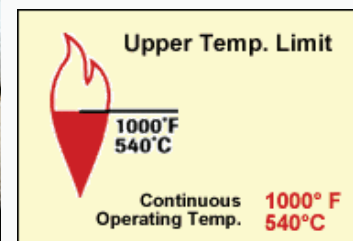

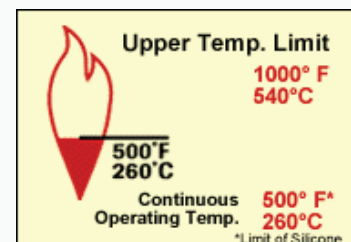

April 2013

AMI-TUF® coated fiberglass cloth is the ideal solution for the outer layer of removable insulation pads on pipes, valves and joints (see AMI-FAB® System for details).

Use AMI-TUF tape as pipe wrap in harsh industrial environments. AMI-TUF can also be fabricated into light, medium or heavy duty AMI-GUARD welding blankets; the silicone rubber coating provides a non-slip surface when used as a floor covering in high traffic areas.

Available in 10 colors to match equipment, simplify identification (hot pipes, cold pipes, etc.), or blend with any industrial environment

AMI-GLAS® Used for Welding Protection, Insulation, Gasketing, Expansion Joints, Heat Shields and Containment, Oven Door Seals, Emergency Fire Blanket, Tadpole Tape and Machinery, Personnel Protection, Safety Clothing and more. AMI-GLAS® is made of 100% fiberglass, and does not contain asbestos or ceramic.

Contact your TTL Sales Representative to discuss how these cloths can service your industry.
